

```
public boolean firstLast6(int[] nums) {  
    return nums[0] == 6 || nums[nums.length-1] == 6;  
}
```

```
public boolean firstLast6(int[] nums) {  
    int first = nums[0];  
    int last = nums[nums.length-1];  
    return first == 6 || last == 6;  
}
```
