

```
public int start1(int[] a, int[] b) {  
    int count = 0;  
    if (a.length > 0 && a[0] == 1) {  
        count++;  
    }  
    if (b.length > 0 && b[0] == 1) {  
        count++;  
    }  
    return count;  
}
```
