

```
public int[] front11(int[] a, int[] b) {
    if (a.length > 0 && b.length > 0) {
        int[] c = { a[0], b[0] };
        return c;
    }
    else if (a.length > 0) {
        int[] c = { a[0] };
        return c;
    }
    else if (b.length > 0) {
        int[] c = { b[0] };
        return c;
    }
    else {
        int[] c = { };
        return c;
    }
}
```

```
public int[] front11(int[] a, int[] b) {
    if (a.length > 0 && b.length > 0) {
        return new int[] { a[0], b[0] };
    }
    else if (a.length > 0) {
        return new int[] { a[0] };
    }
    else if (b.length > 0) {
        return new int[] { b[0] };
    }
    else {
        return new int[] {};
    }
}
```
