

```
public int sum13(int[] nums) {
    int sum = 0;
    for (int i = 0; i < nums.length; i++) {
        int n = nums[i];
        if (n == 13) {
            i++;
        }
        else {
            sum += n; // sum = sum + n;
        }
    }
    return sum;
}
```

```
public int sum13(int[] nums) {
    int sum = 0;
    boolean skipNext = false;
    for (int n : nums) {
        if (n == 13) {
            skipNext = true;
        }
        else if (skipNext) {
            skipNext = false;
        }
        else {
            sum += n; // sum = sum + n;
        }
    }
    return sum;
}
```
