

```
public int redTicket(int a, int b, int c) {
    if (a == b && b == c) { // they're all are the same
        if (a == 2) { // they're all 2
            return 10;
        }
        else { // they're all the same, but not 2
            return 5;
        }
    }
    // if we get to this point, they're not all the same
    else if (a != b && a != c) { // b and c are both different from a
        return 1;
    }
    else {
        return 0;
    }
}
```

```
public int redTicket(int a, int b, int c) {
    if (a == 2 && b == 2 && c == 2) { // they're all equal to 2
        return 10;
    }
    else if (a == b && b == c) { // they're all the same value
        return 5;
    }
    else if (a != b && a != c) { // b and c are both different from a
        return 1;
    }
    else {
        return 0;
    }
}
```
