INDENTATION RULES

1. A line starts at the <u>same</u> indentation level as the <u>previous</u> line.

2. When you type an opening curly bracket, ***IMMEDIATELY*** type the closing curly bracket <u>on the next line</u>.

   Apply Rule 1 to the closing curly bracket.

   The space between the two curly brackets is called a ***<u>BLOCK</u>***.

3. The first line inside a block is indented one level to the right.

4. For the second line inside a block, apply Rule 1.

5. For the line immediately below a closing curly bracket (following a block), apply Rule 1.
