

```
public boolean only14(int[] nums) {
    for (int n : nums) {
        if (!(1 == n || 4 == n)) {
            return false;
        }
    }
    return true;
}
```

```
public boolean only14(int[] nums) {
    for (int n : nums) {
        if (1 != n && 4 != n) {
            return false;
        }
    }
    return true;
}
```
