

```
public boolean no14(int[] nums) {
    boolean got1 = false;
    boolean got4 = false;
    for (int n : nums) {
        if (1 == n) {
            got1 = true;
        }
        else if (4 == n) {
            got4 = true;
        }
    }
    return !got1 || !got4;
}
```
