

```
public boolean twoAsOne(int a, int b, int c) {  
    return a + b == c || a + c == b || b + c == a;  
}
```

```
public boolean twoAsOne(int a, int b, int c) {  
    if (a + b == c) {  
        return true;  
    }  
    else if (a + c == b) {  
        return true;  
    }  
    else if (b + c == a) {  
        return true;  
    }  
    else {  
        return false;  
    }  
}
```
